

Course: 301 - All About Apps (Apple Apps)

Dates: June 27–July 1
Days: MON - FRI
Times: 8:45 am–10:15 am
Classroom: ENGR 106

Course Instructor: Nathan Blaylock
Course Instructor Email: ngblaylock@gmail.com
Office Hours: available upon request

Introduction:

Ever heard the phrase, “There’s an app for that?” Well that pretty much describes the day and age that we live in. In this course we will go over many apps that will help you get the most out of your Apple device.

***Since all technology has a shelf life not all features will be available on all devices. The older the device, the least amount of features that will be available. It is recommend that you have either an iPhone 4s or above and/or iPad 2 or above.*

How to get the most out of this class (not rules):

1. Come prepared! This includes being **1. Correctly connected to the Internet (Wi-Fi)** and **2. Know your apple id and password** before coming to class. Please refer to the handout on how to achieve this.
2. Follow the structure of the class, which will begin with a lecture, followed by hands on projects. If you have questions about your device, make sure that it is relevant to what we are discussing. Any other questions will be open to ask at the end of class.
3. During the lecture, please pay attention to the lecture and not your device.
4. **Get individual help from the YETC Technology Support in EDUC 170 8am–5pm**

Rules:

Be courteous of everyone around you, and do not speak out of turn. It distracts others from getting the most they can out of the class time.

Overview:

Monday: Overview of Apps

- Basics of Apps
- How Apps work on iOS

Thursday: Entertainment

- Books, Music and Video
- Games
