LEGO AUGMENTED REALITY

https://youtu.be/h_L9tMAtyJY

MUSIC

- ▶ Apple comes pre-loaded with iTunes. This works very seamlessly with a Mac
- ▶ Pandora is a radio station that you can listen to for free (ads) or paid (no ads).
- ▶ Spotify is a similar station, but allows you to choose the order of songs played
- ▶ Amazon Music is great if you have an amazon prime membership

MOVIES

- ▶ You can watch movies that you put on your device through iTunes, or pay for videos through the iTunes store
- ▶ YouTube, made by Google, is a free (ads) or paid (no ads) service that is quickly going.
- ▶ Prime Video by Amazon gives you a lot of videos to stream for free with a prime subscription

PHOTOS

- ▶ Apple Photos is pre-installed on your phone and will help organize your photos. iCloud is strongly recommended for this
- ▶ Google Photos is what I use. It is totally free, and you can store unlimited high quality images.
- ▶ Plenty of other photography apps on the app store.

ADOBE SCAN

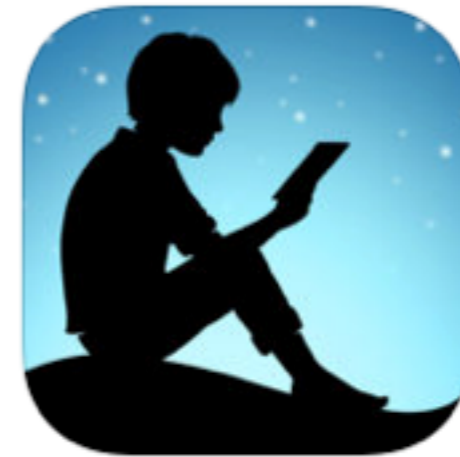

- Because I didn't talk about this during the productivity day, I want to go on a tangent for this app.
- You don't need a scanner in order to scan documents. Use this with your iPhone or iPad camera and scan documents in to your adobe account.

BOOKS

- ▶ iBooks comes with Apple and will let you organize ebooks easily on your device. Purchase or rent books through the iTunes store.
- ▶ Kindle is what I use, because typically books cost less money
- ▶ Overdrive or Libby apps for using a library card to borrow books.

GAMES

▶ Thousands and Thousands of games to play. My favorites are:

i. Words with Friends

ii. Unblock

iii. Solitaire

iv. Free Flow

▶ What are your favorite Games
