NATHAN'S STEPS TO TROUBLESHOOTING

- Define what outcome you expect the app to do.
- Restart the app.
- Look up the solution on Google
- Check the settings.
- Restart (Turn off/on) the device
- Be patient if it doesn't work right away. Sometimes it fixes itself after a while, or after the app gets an update.
- Contact Apple, the cellphone service company, app developer, or somewhere that really knows what they are doing. Unfortunately sometimes they don't even know.

TIPS

-
- ▶ Learn new things that will help you use your phone
 - ▶ Keep up on the latest OS features
 - ▶ You will find that they are super simple things that you can do do make you love your phone even more.

First was the mouse. The second was the click wheel.

And now, we're going to bring multi-touch to the market. And each of these revolutionary interfaces has made possible a revolutionary product – the Mac, the iPod and now the iPhone.

-Steve Jobs, 2007
