HELPFUL LOCATIONS

icloud

Monday, July 8, 2019

- Username and Password, just like all the other accounts that you have
- If you do not know your username and password, FIND OUT WHAT IT IS. This will save you a lot of headache down the road
- ► Things that you use your Apple ID and Password for:
 - ► iCloud
 - ► App Store
 - ► All Apple Apps

HOW **SECURE IS** MY PASSWORD?

TWO-FACTOR AUTHENTICATION

- Apple has been a part of dual authentication for some time now, and it helps improve your security.
- ► Find this setting in Settings>Apple ID> Password & Security
- The idea behind two-factor authentication is that you not only need to know your password, but also have a device associated with your apple ID
- Commonly you will be asked for a 6 digit code to enter, and your phone may primarily be the device used to give you that code, by a text message or by a built in support.
- ► Keep this on, especially if you link your credit card
- Remember that the passcode for the device is required to open the phone

MANAGE YOUR APPLE ID

Forgot Apple ID or password?

icloud

SiOS

- iCloud manages information about you, and syncs all of your devices with it.
- If you only have one device (iPhone, iPad, mac, watch, tv, etc.), you might not need iCloud as much as others.
- Apple apps store information on iCloud. To specify what apps use iCloud, go to Settings>Passwords & Accounts>iCloud.
- iCloud will store passwords for you so you don't have to. It is a feature built into Safari, but you can add passwords in Settings>Accounts & Passwords>App & Website Passwords.
- Manage your Storage by going to Settings>(Your profile at the top)>iCloud>Manage Storage

icloud DRIVE

- This is a confusing subject to people, so let's clarify
- iCloud Drive is only a part of iCloud.
- You get 5GB of storage for your personal files you want to keep. If Apple doesn't care about it, then it goes against your 5GB.
- If Apple needs the information to manage you as a customer, they store it for free.

WHAT TAKES UP ICLOUD STORAGE

- Media purchased through Apple
 - i.Music
 - ii.Videos
 - iii.Books
- Apps that were purchased
- Personal Information

- Documents
- Pictures
- Device Backups
- Family Videos
- eBooks not purchased through Apple
- Text Messages that were saved
- Mail

TOMORROW

We will talk about accessing iCloud from your computer
