GOOGLE PHOTOS

- ▶ Made by Google
- ▶ Takes photos from Apple Photos and copies them into Google Photos.
- ▶ Google Photos is completely cloud based, and free.
- ▶ Easily open them on Mac, Windows, iOS, Android, whatever you want. You just need an internet connection and a Google Account. (**Highly recommended for Windows users!**)
- ▶ Get Google Backup and Sync to move all of your photos from your computer to your Google Photos Account.

DEVICES

Wednesday, July 10, 2019

WIFI

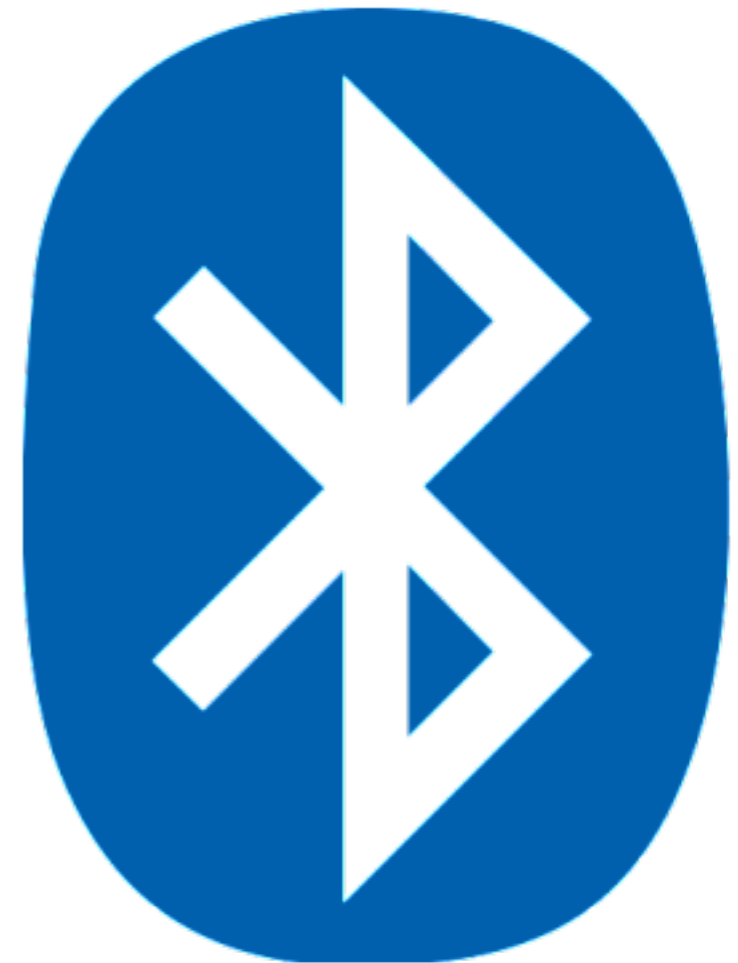

- ▶ Stands for Wireless Fidelity
- ▶ Sends wireless signals back and forth between devices.
- ▶ The most common device we use is a wireless router for internet, but it is not limited to this
- ▶ Control other devices by connecting to the WiFi signal it gives off.
- ▶ Pretty much every device is shipped with WiFi.

BLUETOOTH

- ▶ Named after a Danish king who loved blueberries (His teeth were always blue because of it).
- ▶ Can send signals from 10 to 100 feet, usually around 30 feet.
- ▶ You can use multiple devices
- ▶ At least 95% of devices use it.
