

SHARING

Thursday, July 11, 2019

SHARING MENU

- Each app that has a sharing menu will have different options.
- Depending on what apps you have downloaded will allow you to send information through that app.

AIR DROP

- Share files between Apple devices.
- Eliminates the need to send files through the internet.
- Use it to send mostly photos and videos or websites.
- Really anything else that has that menu option available.

FAMILY SHARING

- Share pretty much everything that you purchase with other family members
 - Apps
 - Music and Videos
- Automatically connect to other's locations (Find iPhone, find friends)
- Use one credit card for multiple apple accounts

<https://www.apple.com/family-sharing/>

ACCOUNTS

- Add multiple accounts to your device
- Use these accounts to manage apps such as:
 - Mail
 - Notes
 - Contacts
 - Calendars
 - Reminders

ACCOUNTS

- Some accounts let you do more things than others. Example:
 - Notes using the iCloud account allows you to lock apps, do more formatting, and collaborate on the same note.
- Difference between collaborate and share

WHAT IS COMING IN IOS 13?
