

# Intermediate iOS

ENGR 205  
July 8–12, 2019  
3:00–4:15 pm

## WELCOME

Intermediate iOS is for anyone who has an iPhone, iPad or iPod touch. This class will take your iOS knowledge to the next level as we look at more advanced features. We will look at advanced settings to help you personalize your device, and help you understand iCloud and some alternatives. We'll look at connecting your device to your computer, where you can speedily manage your content and save space on your device. Come prepared to learn about your iOS device.

NOTE: Since all technology has a shelf life, not all features will be available on all devices. With older devices, fewer features will be available. It is recommended that you have either an iPhone 5s or newer and/or iPad Mini 2/iPad Air or newer.

## What you should do before class:

There are a few things that will be helpful to you and to me before you come to class.

1. Make sure you are connected to the internet at the University. You do this by connecting to Bluezone and going to [bluezone.usu.edu](http://bluezone.usu.edu) and following the steps there. If you need help connecting to the internet, you can get help from the YETC or the IT Service Desk.
2. Make sure that you know your Apple ID and Password. You may find that you use it frequently during the class.
3. Friday will be a class choice day. The earlier you let me know what you would like to learn, the more time I will have to prepare.
4. Come prepared to learn.

## Rules:

1. Turn your phones on silent or Do Not Disturb. We all will need to have our phones out, but they should not be distracting to others who are learning.
2. Be courteous to everyone around you, and do not speak out of turn. It distracts others from getting the most out of the class time.

## Course Website:

For the course slides, please visit the course website: <http://ios.nathanblaylock.com/>.

## Weekly Schedule

Monday	Apple ID and iCloud <ul style="list-style-type: none"><li>● Password Security and Accounts</li></ul>
Tuesday	Connecting to your Computer <ul style="list-style-type: none"><li>● Photos</li><li>● Videos</li><li>● Music</li></ul>

Friday	Accessibility, and Class Choice <ul style="list-style-type: none"><li>● Accessibility features that make using your phone easier to use.</li><li>● Tell me what last few things you want to learn</li></ul>

## Helpful Locations

Here are some helpful locations for you to get all the help you need. These places are always happy to help anyone coming through the door.

**YETC Computer Lab**– Computer Lab Technicians are always available to help anyone coming in with a technology question. They have been very helpful in the past with helping people and out their ID and passwords for multiple accounts. They will also be available to help you with your iOS device and answer some questions you still had from class that were not answered.

LOCATION: [Education Building \(EDUC\)](#) First Floor

**IT Service Desk**– University IT Professionals. These workers know more than anyone about connecting to the internet on campus or figuring out your password. They have been very helpful to summer citizens so you can give them a try as well.

LOCATION: [Janet Quinney Lawson \(JQL\)](#) North Entrance
